Cleaning and care

Removing the Vega blade set

Hold the blade set sideways and push it off the front of the trimmer. When replacing the blade set, insert the two catches into the housing and click the blade set into place.

Cleaning the blade set

Use a brush to carefully clean the blade set and remove remnants of hair.

Oiling the blade set

The blades need lubrication after each cleaning. Apply a drop of oil (GT604) to the middle and both ends.

Removing the Isis blade set

Remove the screw using the hex wrench from the bottom of the charger. Take off the shaving head. Perform cleaning and lubrication as described above. Click blade set into place and tighten screw.

Note:
Blood, pus and wound secretion can adhere to the blade. Please clean and oil the blade after each use.
