

GT754D 3,0 mm

GT758D 5,0 mm

GT770D 7,0 mm

GT779D 9,0 mm

Properties of DLC coats

- high level of protection against wear
- scratch resistance
- good corrosion resistance

For the Aesculap Favorita cutting heads, this means:

- less heat development
- better gliding
- higher corrosion resistance
- longer periods between regrounding

SPECIAL EDITION

Favorita Clipping Heads with DLC Coating

DLC – ‘Diamond Like Carbon’ coatings significantly improve the performance and life of products and tools. DLC combines the characteristics of high microhardness, low wear and extremely low sliding friction coefficient like no other coating system. Thanks to the resulting mechanical material properties, DLC is predestined for use in places where components move against each other, creating friction and wear.

AESCULAP® – a B. Braun brand
